

## St. Louis Lambert International Airport

### PROJECT DESCRIPTION

**Client:** HMS Host, Vino Volo

**Location:** St. Louis Lambert International Airport

**Surface Area:** Varies

**Architect:** M2 Architecture Studio

Airport restaurants don't just serve food and drinks, they welcome visitors to the city, offer travelers a place to rest and recharge.

Knoebel Construction has built more than a dozen airport projects in recent years including Vino Volo, California Pizza Kitchen, Starbucks, Beers of the World, Mike Shannons Grill, Pizza Studios, Chili's, Chili's Too, St. Louis Brewmasters Tap Room and Stella Artois.

We create spaces that are efficient and manageable for owners, thoughtfully convenient for guests. And we understand the challenges of managing construction in the busy, clean environment of an airport.
